COMPANY ACTIVITIES

FIELDS OF ACTIVITIES

- MECHANICAL AND ELECTRICAL WORKS
- PRIMARY WATER TREATMENT
- POTABILIZATION
- DESALINATION
- SEWAGE TREATMENT
- INDUSTRIAL WASTEWATER TREATMENT
- TERTIARY TREATMENT
- CHEMICAL DOSING SYSTEM
- SLUDGE TREATMENT
- SLUDGE DEWATERING SYSTEM
- SOLID HAZARDOUS WASTE MANAGEMENT

CONTRACTUAL ARRANGEMENTS

- ENGINEERING SUPPLY
- ENGINEERING AND EQUIPMENTS SUPPLY
- TURN-KEY PROJECT
- FINANCED PROJECT
- BUILD OPERATING TRANSFER (BOT.)

AN INTRODUCTION TO MCON

MCON INTER CORP. one of the leading and best known firms in the field of water and wastewater engineering nowadays was established in 1983. The specialized fields in equipments supply and installation for water and wastewater treatment plant. At first start, the company capitalized at one million baht and **Mr. Manu Meksopavankul** assumed post of Managing Director and founder.

It was not long before this highly skilled small group expanded its activities to included total water and wastewater engineering services with a fully capable system covering all phases of water and wastewater and manage techniques from small potable water treatment up to water and wastewater treatment plant for municipality.

Throughout its history, **MCON** has increasingly directed its efforts towards improving its own experience and know-how, specializing in technological development and reliance. The success of this move is evident in the fact that MCON's high level of experience and know-how is widely recognized by experts both in public and private sector.

MCON is presently operating in main basic fields such as water treatment plant, wastewater treatment plant, sewage treatment plant and solid waste management. Each department is fully staffed to provide all essential services within its area of responsibility. These departments work closely in coordination with each other to solve water supply, wastewater and solid waste problems in an efficient and responsible way that is compatible with the water and wastewater engineering needs and with the environmental goals of Thailand.

CAPABILITY AND EXPERIENCE

MCON is an environmental engineering company that provides within predetermined time and cost limits, the complete range of services and assistance in each stage of the realization of a project. MCON's technological diversification, its qualification and experiences are proved by the large number of projects carried out and currently way in the field of water and wastewater treatment. The professional engineering staffs having experience over 15 years in this field.
